# Containers Will Revolutionize the Way We Develop and Deploy Our Applications in the Future

Program  
of the  
day

Why Should You Care about Containers?

How Do We Create Containerized Applications?

Where Does Continuous Delivery Fit In?

How Can VSTS Help in This Process?

How to Develop and Move Containers from Local PC to a Cluster?

What Do We Need to Do for That?

Continuous Delivery Goes Beyond  
the Pipeline!

Shipping the Monolith.

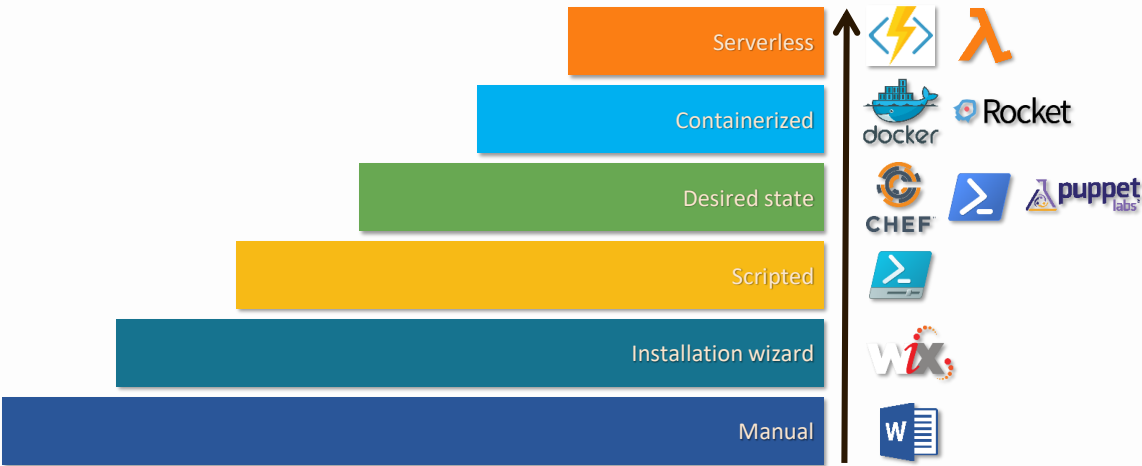

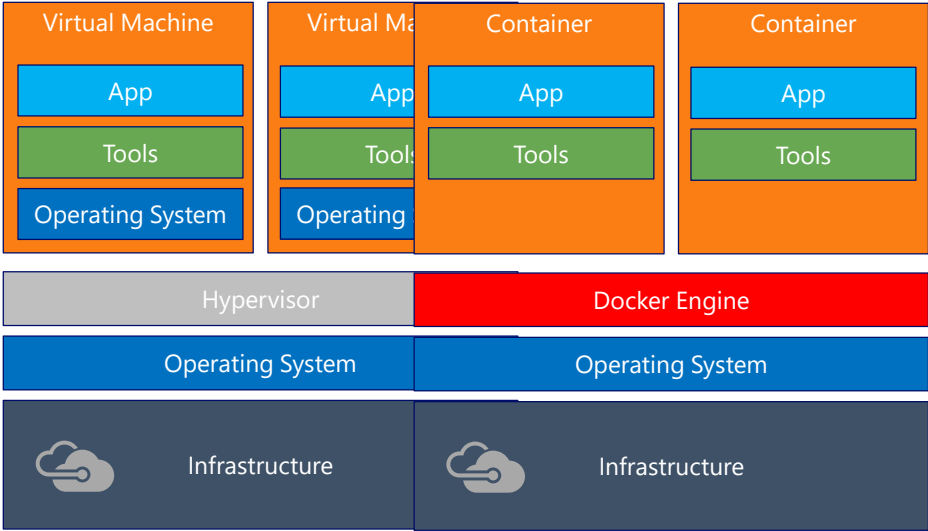

# Traditional vs. Microservices Architecture

# Evolution of Application Delivery

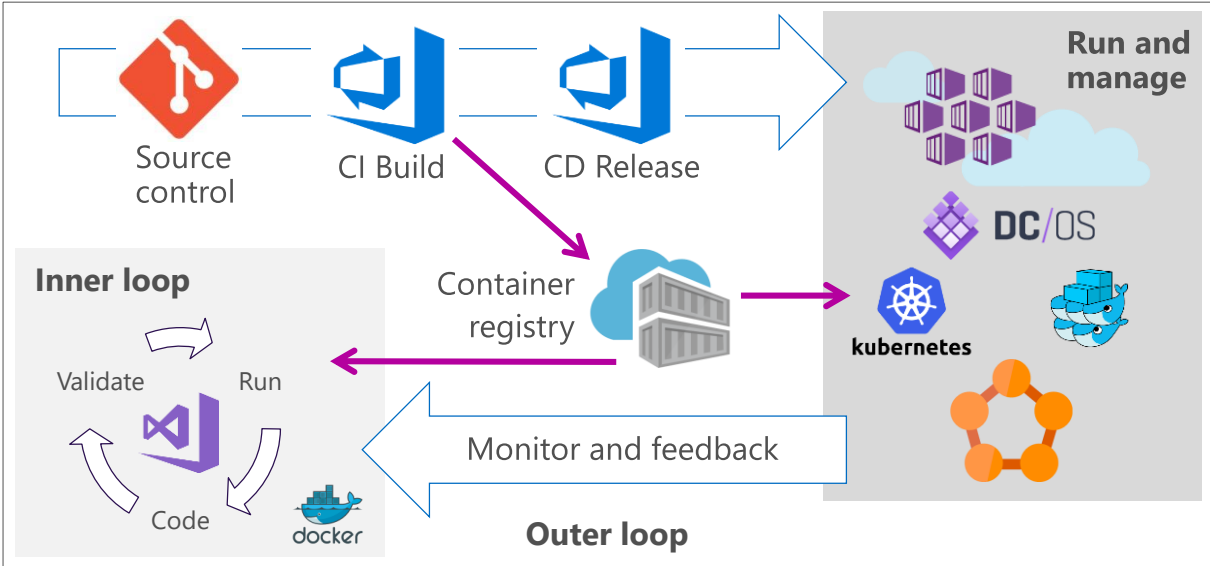

# Virtual Machines vs Containers

# Moving your container from laptop to cluster

demo  
From Laptop to cluster

# A New Way of Deployment

## Continuous Deployment

## Containerized Delivery

Program  
of the  
day
